5th International Symposium of Gunma University Medical Innovation and 9th International Conference on Advanced Micro-Device Engineering (**GUMI&AMDE 2018**)

Numerical Simulation for Optimization of Unsteady Rotating Wind Turbine

Bai Xueyan, Anna Kuwana and Haruo Kobayashi

Division of Electronics and Informatics,

Faculty of Engineering and Science, Gunma University

Point of this work

We performed numerical simulations around a wind turbine to **find the optimum blade shape**.

Results

When the gap is large, the torque coefficient is bad.

The highest torque coefficient.
