Conference: 2016 IEEE 13th International Conference on SICT
Location: White Horse Jianguo Hotel, Hangzhou, China
Date: 2016/10/24~2016/10/29

Presentation Title:
Study of Gray Code Input DAC Using MOSFETs for Glitch Reduction
Gopal Adhikari, Richen Jiang, Haruo Kobayashi
2016 IEEE 13th International Conference on SICT, White Horse Hotel, Hangzhou, China(Oct.26-28)
Schedule
10/24 (Monday): Haneda Airport departure, arrival at the hotel
10/25 (Tuesday): Tour to West Lake, Lingyin Temple
10/26 (Wednesday): Hangzhou Conference (My presentation, 16:30, Meeting Room 3B)
10/27 (Thursday): Hangzhou Conference
10/28 (Friday): Hangzhou Conference, Banquet
10/29 (Saturday): Shanghai Airport departure, Haneda Airport arrival

Purpose of International Conference
To present my research in front of international delegates and other researchers
To learn the research results of different researchers and students
To learn the presentation skills of students of different countries
To learn about the Chinese culture, environment and arts
To visit different places and taste different foods

10/24 (Monday): Haneda Airport departure, arrival at the hotel
Everyone met at the Haneda International Airport at around 12 pm, ready to take off and excited for the upcoming international event. Some pictures at the Haneda Airport before departure and some during train transfers are inserted below.
10/25 (Tuesday): Tour to Leifing Pagoda, West Lake, Lingyin Temple

The second day at China was exciting as well as tiresome. Visited the Leifing Pagoda, West Lake and Lingyin Temple. Language was the major problem during the visit. If Mr. Wang was not with us, we would have a lot of problem. It was very hard to communicate with the locals. Besides difficulties of language barrier, we also learnt to make Chinese Tea and taste it. Below are some pictures taken during the trip.
After a long trip at the locations around the west lake, everyone was tired. So we took a short rest and some great tea.

Taking a short rest after a long walk uphill

Learning to make Chinese Tea

10/26 ~28 (Wednesday~Friday): Presentation

This was the first day of presentation. I attended several presentations. I got interested in the keynote presentation by John A. Rogers titled Soft Electronics for the Human Body. After I attended several other presentations, it was time for my own. It was in meeting room 3B at 16:30. I was confident and gave a pretty nice presentation. It was a good opportunity to express my research. No questions were put forward, so I think that everyone understood my research. I attended several other presentations of our university too. During the presentations, I learnt that studying hard gives ideas for new inventions. Here are some presentations pictures of our laboratory members.
Gunma University professors and students during their presentation
10/29~10/30 Banquet and Departure

The final night of the ICSICT 2016 featured some exquisite cuisine of probably Chinese origin and some cultural session. All participants inside one big hall was a great experience. The cultural events were followed by prize distribution. Everyone of GU were happy as two of our presenters (Mr. Kojima and Mr. Tsukiji) were awarded for excellent student’s paper award. Congratulations to these two heroes of the conference from GU. The moments during the Banquet were captured and depicted below.

Finally, Early in the Saturday morning, we departed from the hotel and transferred trains to finally arrive at the Haneda Airport.

Finally

- Displayed my research with international delegates and researchers.
- Had a chance to listen and learn different innovations in Electronics
- Had a chance to see different cultural aspects, art and religion.
- Had a chance to taste different delicious food.
- Visited temples, pagodas and see environment.
